Summer Bay Resort

Lang Tengah Island · Terengganu · Malaysia

#1 Over half of Malaysia's surveyed coral reefs bleached

- ➡️ 50.7% of corals bleached across all sites
- ➡️ 34.1% of corals died
- ➡️ Some sites saw over 80% coral death

#2 Coral reefs in Terengganu was hit the hardest

More than 80% of the corals died at some sites, while the average coral mortality was nearly **45%**

#3 Not all corals are equal— we lost most of the reef builders

Complex, branching corals create reef structure and fish habitats.Their loss **reduces biodiversity**, **reef tourism appeal**, and **the reef's ability to recover.**

Pulau Lang Tengah, Terengganu

April 2024 → August 2024

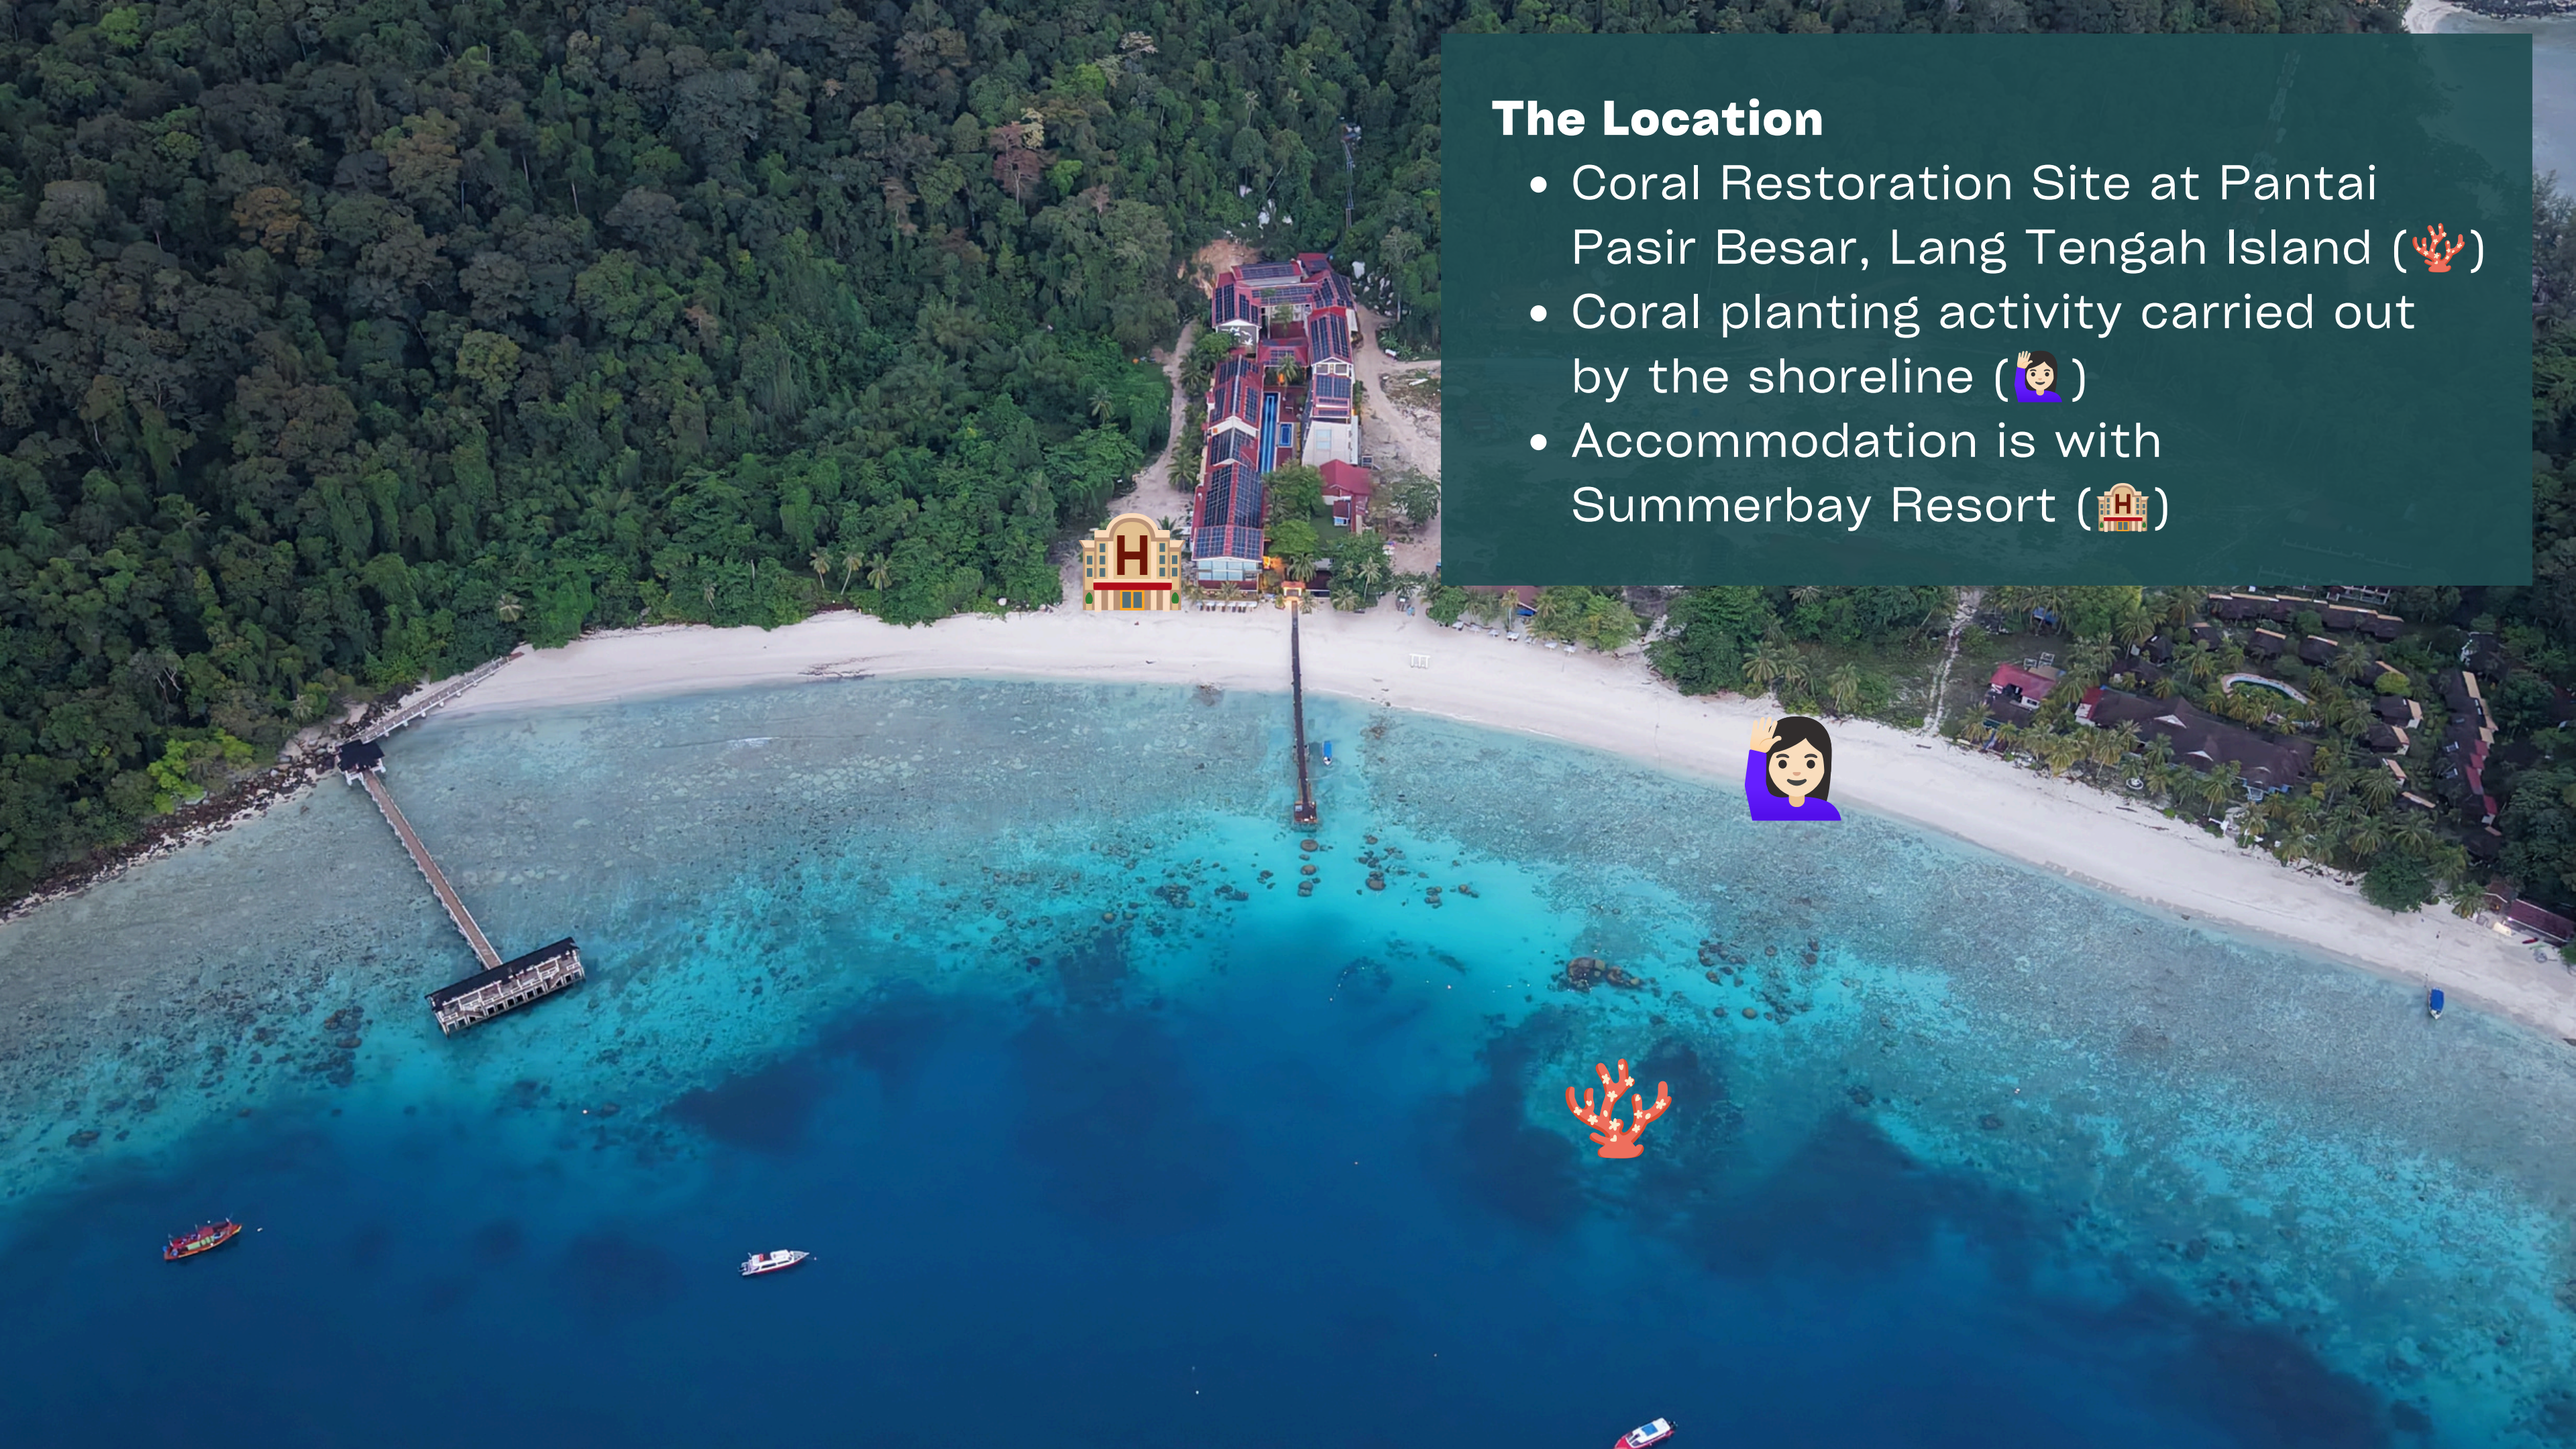
WHAT WE DO

Research

Apply knowledge for coral restoration

Citizen Restoration Program

Monitor and measure success



The Location

- Coral Restoration Site at Pantai Pasir Besar, Lang Tengah Island (🪸)
- Coral planting activity carried out by the shoreline (🙋‍♀️)
- Accommodation is with Summerbay Resort (🏨)

The start (2021)

The results (2023)

The method

June
2023

2025

April
2024

2026

CITIZEN RESTORATION PROGRAM (CRP)

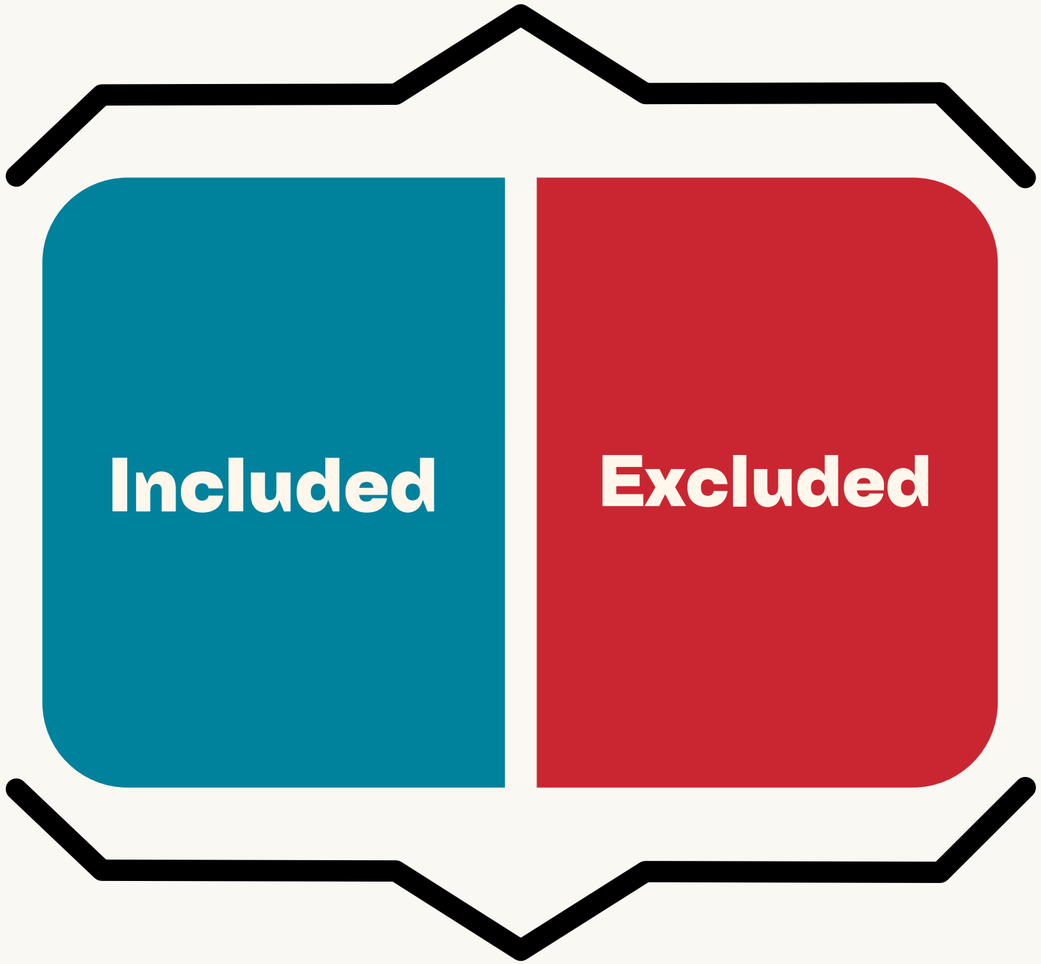
- **Designed for all experience levels** – not limited to SCUBA divers!
- **Science-backed and guided by marine biologists –** ensuring ecological effectiveness.
- **Hands-on and meaningful –** participants contribute directly to coral restoration with their own coral frame
- Directly supports **Sustainable Development Goal 14: Life Below Water & strengthens brand ESG performance**
- **Opportunity for long-term CSR collaboration –** grow from a one-day activity to an ongoing impact partnership

CITIZEN RESTORATION PROGRAM (CRP)

- **Not a tourist activity or casual reef tour**
- **Not symbolic or “one-off planting” with no follow-up**
- **Not reliant on community handouts or donations – designed as a science-based conservation model**
- **Not a greenwashing tool – impact is tracked, reported, and transparent**

SCOPE OF COLLABORATION

1. **Coral planting & restoration –** Full setup, facilitation, and in-water guidance.
2. **Pre-event prep –** Coral collection, frame prep, and site logistics.
3. **Monitoring & reporting –** 1-year coral tracking and impact updates.



1. **Resort bookings –** Handled directly with the resort (we assist with initial quotes).
2. **Transport to island –** Boat included in resort package; other travel not arranged.
3. **Extra activities –** We don’t manage tours or beach clean-ups, but we can help you get in touch with people who do!

PROPOSED AGENDA

Time	Activity
Day 1	
10:30 AM	Arrive Summerbay Kg Mangkuk Jetty
11:00 AM	Board boat to island
12:00 PM	Arrive at Summerbay Resort
12:15 PM	Check-in, arrival briefing by resort
12:30PM - 2:00PM	Lunch
2:30 PM	Welcoming session with Coralku
7:00 PM	Dinner
Day 2	
7:30 AM	Breakfast
8:30 AM	Coral planting briefing with Coralku
9:00 AM	Coral planting session 1 (20 pax)
3:00 PM	Coral planting session 2 (20 pax)
4:30 PM	Coral planting session 3 (20 pax)
7:00 PM	Dinner
8:30 PM	Educational talk: Corals and Ecosystem restoration (optional)
Day 3	
7:30 AM	Breakfast
9:00 AM	Check out
9:30 AM	Board boat to mainland

Our location:
Pulau Lang Tengah

- Over 200 species of fish, 120 species of hard corals, 500+ species of marine life are found here
- Best time for coral planting from April to October

Thank you for your interest in coral restoration

Here at Coralku, we're laying the groundwork for coral restoration science, but the true fight for Malaysia's coral reefs requires all hands on deck. We stand by our motto, ***coralku, coralmu jua,*** to remind people that this is a shared mission, and we cannot do this alone.
